COMMANDING OFFICER, FLEET READINESS CENTER SOUTHWEST
STATEMENT OF ENVIRONMENTAL AND SAFETY POLICY

Our Mission: "Generate readiness through timely and responsive production of engines, aircraft, and components for the warfighter."

Our Vision: "To be the premier maintenance repair and overhaul organization in the Department of Defense by providing the best value, highest quality, and most reliable products."

In support of our mission and vision, safety and environmental stewardship is essential to the success of Fleet Readiness Center Southwest. To fulfill this responsibility to our co-workers, visitors, and our neighbors we are committed to:

- Comply with all applicable safety and environmental regulations, requirements, and obligations.
- Protect human health and the environment.
- Prevent workplace injuries and pollution to the environment.
- Continually improve our safety and environmental performance.

It is the responsibility of every employee to protect human health and the environment. Employees are directly accountable to follow all occupational health, safety, and environmental policies and regulations in the course of accomplishing work. Contractor personnel are held to the same level of accountability. If you have any safety or environmental concerns or ideas to improve our performance, contact either the Safety Office or the Environmental Program Office. This policy shall be communicated to all employees, contractors, visitors, customers, and stakeholders.

A. K. JARAMILLO
Captain, U.S. Navy
Commanding Officer
